----------	--------------------

Weighted Average Yield To Maturity is the discount rate that equates the present value of a bond's cash flows with its market price (including accrued interest), weighted by each bond's market value weight in the fund. The measure does not include fees and expenses. For bonds with optionality, this yield is the yield-to-worst. This advertisement or publication has not been reviewed by the Monetary Authority of Singapore. This has been provided for information purposes only and does not constitute an offer or solicitation to purchase or sell shares in the Fund. Any quoted performance is not indicative of future results. BlackRock does not guarantee the performance of iShares. There are risks associated with investing, including the possible loss of principal. Before deciding to invest, investors should read the prospectus carefully including the investment objective and risk factors relating to the Fund, including the arrangement in the event the Fund is delisted. The value of the units and any income may fall or rise. The Fund's prospectus is available and may be obtained from the website blackrock.com/sg/en/ishares. Investors should note that the Fund differs from a typical unit trust as units of the Fund are bought and sold at market price (not NAV), and units may only be redeemed by participating dealers in large creation/redemption unit sizes. The listing of units of the Fund on the SGX does not guarantee a liquid market for the units. Transactions in units of the Fund will result in brokerage commissions. J.P. Morgan and the J.P. SUSTAINABILITY CHARACTERISTICS

Sustainability Characteristics can help investors integrate non-financial, sustainability considerations into their investment process. These metrics enable investors to evaluate funds based on their environmental, social, and governance (ESG) risks and opportunities. This analysis can provide insight into the effective management and long-term financial prospects of a fund.

The metrics below have been provided for transparency and informational purposes only. The existence of an ESG rating is not indicative of how or whether ESG factors will be integrated into a fund. The metrics are based on MSCI ESG Fund Ratings and, unless otherwise stated in fund documentation and included within a fund's investment objective, do not change a fund's investment objective or constrain the fund's investable universe, and there is no indication that an ESG or Impact focused investment strategy or exclusionary screens will be adopted by a fund. For more information regarding a fund's investment strategy, please see the fund's prospectus.

MSCI ESG Fund Rating (AAA-CCC)	BBB	MSCI ESG Quality Score (0-10)	4.87
MSCI ESG Quality Score - Peer Percentile	23.81%	MSCI ESG % Coverage	86.23%
Fund Lipper Global Classification	Bond Asia Pacific HC	MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES)	557.70
Funds in Peer Group	147		

All data is from MSCI ESG Fund Ratings as of **21 Mar 2024**, based on holdings as of **29 Feb 2024**. As such, the fund's sustainable characteristics may differ from MSCI ESG Fund Ratings from time to time.

To be included in MSCI ESG Fund Ratings, 65% (or 50% for bond funds and money market funds) of the fund's gross weight must come from securities with ESG coverage by MSCI ESG Research (certain cash positions and other asset types deemed not relevant for ESG analysis by MSCI are removed prior to calculating a fund's gross weight; the absolute values of short positions are included but treated as uncovered), the fund's holdings date must be less than one year old, and the fund must have at least ten securities.

ESG GLOSSARY:

MSCI ESG Fund Rating (AAA-CCC): The MSCI ESG Rating is calculated as a direct mapping of ESG Quality Scores to letter rating categories (e.g. AAA = 8.6-10). The ESG Ratings range from leader (AAA, AA), average (A, BBB, BB) to laggard (B, CCC).

MSCI ESG Quality Score - Peer Percentile: The fund's ESG Percentile compared to its Lipper peer group.

Fund Lipper Global Classification: The fund peer group as defined by the Lipper Global Classification.

Funds in Peer Group: The number of funds from the relevant Lipper Global Classification peer group that are also in ESG coverage.

MSCI ESG Quality Score (0-10): The MSCI ESG Quality Score (0 - 10) for funds is calculated using the weighted average of the ESG scores of fund holdings. MSCI rates underlying holdings according to their exposure to industry specific ESG risks and their ability to manage those risks relative to peers.

MSCI ESG % Coverage: Percentage of the fund's holdings for which the MSCI ESG ratings data is available. The MSCI ESG Fund Rating, MSCI ESG Quality Score and MSCI ESG Quality Score – Peer Percentile metrics are displayed for funds with at least 65% coverage (or 50% for bond funds and money market funds).

MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES): Measures a fund's exposure to carbon intensive companies. This figure represents the estimated greenhouse gas emissions per \$1 million in sales across the fund's holdings. This allows for comparisons between funds of different sizes.

MSCI Weighted Average Carbon Intensity % Coverage: Percentage of the fund's holdings for which MSCI Carbon Intensity data is available. The MSCI Weighted Average Carbon Intensity metric is displayed for funds with any coverage. Funds with low coverage may not fully represent the fund's carbon characteristics given the lack of coverage.
